

NOTICE OF DEVIATION

Section 1 (To Be Completed By The Person Discovering The Deviation)

Study Number: TOX213

Source Document(s): ☒ Protocol ☐ SOP (List SOP Number(s)):

Describe the Requirement (give section numbers for SOPs):

"Diet formulation is planned to be conducted weekly during the study."

Describe the Deviation: Date of Occurrence: ~ May 23, 2008

Only a single feed formulation was conducted for this study. This decision was based upon the availability of stability data for nicotine in the formulated feed of 30-day duration at room temperature. These data indicated that the formulated feed preparations were stable in respect to nicotine concentration for a period longer than the 14-day duration of this study. Therefore, a single preparation of the formulated feed was adequate for the purpose of this study.

Documented By: Paul Ayres

Date: Nov. 3, 08

Section 2 (To Be Completed By The Study Director)

Describe the Corrective Action(s) To Be Taken In Response To The Deviation:

No corrective action was required.

Assessment Of The Deviation's Impact Upon The Outcome Of The Study:

The only impact this change in the protocol could produce is to insure a more consistent nicotine concentration in the formulated feed by eliminating an addition feed formulation. A single feed formulation did not impact the results of the study based upon the stability of nicotine in the formulated feed being longer than the duration of this study.
