

tower, and that at present she "has no plans" to permit such a use. In opposition, Central Du Page submits an affidavit from Enstrom, who states that he had several conversations with Mrs. Cline (and her husband) concerning an exchange of property which would have permitted the utilization of the adjacent land as proposed, and that these discussions led him to believe that the land would be available. Regardless of what Mrs. Cline appeared to have been willing to do regarding the disputed property in the past, it is clear from her May 4 affidavit that she does not now intend to permit Central Du Page to use the property. We are therefore constrained to add an issue to determine whether Central Du Page has sufficient land available to build its tower as proposed.<sup>4</sup>

Accordingly, it is ordered, That the petition to enlarge issues, filed on May 23, 1967, by Du Page County Broadcasting, Inc., is granted to the extent indicated herein, and denied in all other respects; and

It is further ordered, That the issues in this proceeding are enlarged by the addition of the following issue: To determine what land is available to Central Du Page County Broadcasting, Inc., for a transmitter site, and whether the land available is sufficient to effectuate its proposal.

Adopted: July 24, 1967.

Released: July 26, 1967.

### FEDERAL TRADE COMMISSION

#### CIGARETTES

#### Testing for Tar and Nicotine Content

The Federal Trade Commission, having been advised by the staff that the cigarette testing laboratory has satisfactorily completed its trial tests, hereby issues directions to its staff to commence the first formal test, under the following conditions:

1. Smoke cigarettes to a 23 mm. butt length, or to the length of the filter and overwrap plus 3 mm. if in excess of 23 mm.,
2. Base results on a test of 100 cigarettes per brand, or type,
3. Cigarettes to be tested will be selected on a random basis, as opposed to "weight selection",
4. Determine particulate matter on a "dry" basis employing the gas chromatography method published by C. H. Sloan and B. J. Sublett in Tobacco Science 9, page 70, 1965, as modified by F. J. Schultz' and A. W. Spears' report published in Tobacco Vol. 162, No. 24, page 32, dated June 17, 1966, to determine the moisture content,
5. Determine and report the "tar" content after subtracting moisture and alkaloids as nicotine) from particulate matter,
6. Report tar content to the nearest whole milligram and nicotine content to the nearest 1/10 milligrams.

The Commission directs that the test cover approximately 50 of the major brands and types (many brands are sold as regular, and king size, or filter, etc.) and all brands for which any tar or nicotine statement appears on the label or in the advertising. With respect to the latter, one purpose of the test will be to determine the accuracy of such statement. Cigarettes for testing will be purchased on the open market in 50 localities throughout the United States.<sup>1</sup>
